

## Shower Screens Factsheet

# Sliding Shower Screens

The Australian Design Award winning Series 9300™ Sliding Shower Screen combines great looks with low maintenance.

### Correct Measurement

To achieve a great finished product it is imperative that your Shower Screen be measured correctly. We take particular care with:

**Height** - we generally aim to “tie in” the height with a tile grout line, or door/window frame.

**Plumb/Levels** - how far out are your wall & floor tiles? If they vary by more than 2mm we manufacture your Shower Screen “out of square”.

**Door Size/Position** - which is the best way to open your doors considering the position of taps, towel rails, doors, etc.?

### Product Features and Benefits

- Ideally suited to “tight” bathrooms where a pivot door system is impractical.
- Heavy duty non-corrosive components used throughout.
- The Heavy Duty adjustable rollers and guide blocks ensure years of trouble free use.
- The design of the aluminium sections and components ensure easy cleaning.
- Our system can accommodate all design situations.
- Available in Grade A Safety Glass, Clear & Obscure Patterned.
- Frame colours include Bright Silver, White, Almond and Black.

### Frequently Asked Questions

#### How long will it take to install?

It takes between 3 and 4 weeks to manufacture and install your “custom made” Shower Screen.

#### What does it Cost?

A “3 Panel” Front and Return Panel, 1900x900x900mm costs approximately \$1315 incl. GST (indicative price shown may vary significantly subject to actual size and site conditions).

#### Don't the Doors Jamb?

The Series 9300™ is a proven, trouble free design. In addition it can be manufactured using the sequential door opening system.

#### Water Loss Potential?

Please refer to the “Water Loss Guide” on our website.

#### 🕒 48 Hour E-Quote

Send us your Plans and we'll get back to you within 48 hours.

#### 📅 Free Measure & Quote
